

Red Alert

Emergency Information

What to do in case of flooding and heavy rain.

Protect yourself, children and the elderly by implementing these safety measures:

- Close all doors of cellars, basements and garages, without exposing yourself to dangers and vacate ground floor rooms if you can;
- Stay away from floodable areas and if possible move to upper floors
- Do not enter basements, garages or cellars;
- Avoid underpasses;
- Do not go on the river banks;
- If you are outdoors try to reach a high point, avoiding slopes or artificial embankments which could collapse.

Stay informed on the emergency alerts in the area and on the measures adopted by your municipality.

Follow instructions on institutional websites and your town social networks, Telegram channel "Bassa Romagna Emergenze", Alert System.

Share what you know about the alert and the behaviours to adopt with the elderly, children and people who might find it difficult to stay up-to-date online. Word of mouth is a very effective tool!
